EXPERIENCE

2019 Calcmenu Philippines Inc. Intern Web Developer

- Worked on the administration management of the Face Recognition Attendance System.
- Created an Android application capable of scanning QR and barcodes.

2020 Partnered with GP NAPO Freelance Web Developer

- Collaborated with the GP NAPO team on the development of the company's website as a side project.

2021 Partnered with Chef Morris Danzen Freelance Web Developer

- Led the team in developing and maintaining the personal blog of a Filipino chef and YouTube vlogger currently located in Italy.
- Developed the functionalities of Chef Morris's customizable blog, including the homepage and the display of his recipes and details.

2019 - 2021 Cafe24 PH L1 Web Developer

- [2019] Tasked with creating an application for an e-commerce web app to manage sellers' coupons.
- [2020] Assigned to a new team responsible for handling one of the company's biggest and highly prioritized projects.
- Tasked with optimizing the "Tollgate" project to enhance the app's performance and code quality.
- Also worked on implementing new features for the "Tollgate" project, which consists of 5 modular apps connected via Redis and its API.
- [2021] Transitioned to a new team to work on highly prioritized and time-sensitive FGSTF Projects.

2022 - 2023 Cafe24 PH L2 Web Developer

- Was assigned as a co-lead for one of our initial projects as an L2 web developer, the Taiwan Line Shopping Management Service Package.
- Led the development of significant improvements for the Instagram Widget App, which involved optimizing scalability, enhancing performance, and implementing paid subscriptions for the app.
 - Architected scalable and high-performance web application, ensuring optimal user experience and responsiveness.
 - Mentored and provided guidance to junior developers, fostering their technical growth and ensuring code quality.
 - Implemented coding standards, best practices, and conducted code reviews to maintain high-quality codebase

2023 - Present EonX (Flexilabs, Inc.) Backend Developer

Assigned as one of the backend developers in the Performance and Maintenance team, focusing primarily on enhancing projects through upgrades and optimization, and streamlining workflows for developers.
